

Hi there,

We've got a big update in this edition of the Synergy At Work email Newsletter with lots of good information covering a number of different industries.

The great news is we're just about to enter the last month of winter so preparation should be well underway for spring and summer projects with the longer days getting closer. We won't bore you with any more detail here so from the friendly team at Synergy Positioning Systems, we'll sign off, have a great week and we'll talk to you soon.

[Quantifying Machine Control Savings with Base Civil](#)

Paul Roberts and his team at Base Civil in Hamilton have just undertaken a big change for the better and he's smiling all the way to the bank.

Having utilised GPS and setout equipment from another manufacturer for the past year or so, Base Civil decided that investing in 3D machine control technology for their grader and 20 tonne excavator would prove a crucial next step. Click the link below to read more about the team from Base Civil and their experiences with Topcon Machine Control technology.

➤ *New Staff Member: Cody Hughes - UAV Operator*

Cody Hughes - UAV Operator
Auckland, New Zealand.

After leaving the Royal New Zealand Air Force where he was working as an Avionics Technician for 7 years, Cody has been involved with both oceanic and aerial remotely operated vehicles. His work has seen him involved with many systems and using multiple disciplines around the globe including the USA, Africa, Brunei, Indonesia and the United Kingdom.

On returning to New Zealand he came on board with Synergy Positioning Systems to head up our UAV Operator team.
