

Hello there

Welcome to another news update from Synergy Positioning Systems. The year is certainly moving through at pace. In this update we lead in with a helpful article explaining machine control and the benefits of this innovative technology for those that are hearing all about it but are still getting to grips with the technology.

Also this month we have a run down on our 3D laser scanning services and follow it up with a new product release from Faro, the Faro Focus X 130. We also talk about how our product hire options have helped Cambridge-based civil and mining contractor, C&R Developments work smarter and introduce Pip Carson who heads up the Synergy Hire division.

All in all, a lot of great content and updates this month. We hope you enjoy reading them as much as we've enjoyed being involved in their making.

From the team here at Synergy, thanks for reading and we'll talk to you soon.

Machine Control Explained. How does it Save Time and Money?

Advanced 3D machine control technology is ensuring faster, safer and more accurate work for contractors like Cameron Civil Ltd.

Utilising satellite positioning and digital 3D modelling to ensure dozer, grader and excavator operators can see where they are on any site in real-time, Topcon's machine control technology effectively ensures every project is a stakeless project.

Find out how machine control works and how it's helping contractors see gains in both productivity and cost savings...

➤ *QuarryNZ Annual Conference Coming up in July!*

2014 QuarryNZ Conference 16-18 JULY, WHANGAREI

Each year the Aggregate and Quarry Association of NZ and the Institute of Quarrying NZ hold an annual joint conference.

The conference is an opportunity for all those involved in the quarrying industry to interact and exchange ideas, take the opportunity to hear the experiences of guest speakers and to socialise with old friends and colleagues and to make new contacts. This year, Synergy will be at the conference showing amongst other equipment, our latest UAV technology and services. If you're heading to the conference make sure you come and see the team on stand 42 and have a chat about how UAV technology is being put to work in your industry.

For more information on the QuarryNZ Conference, click below.

➤ *Synergy Hire adds Flexibility to the C&R Developments Fleet*

For contractors C&R Developments, the ability to lease Topcon machine control technology introduced them to an entirely new way of working.

Synergy Positioning Systems boasts an array of direct hire or lease options on Topcon machine control equipment, enabling entities of all sizes and disciplines to benefit from technology designed to help them work faster and smarter.

Read about how C&R Developments used lease options as a good way of testing out machine control on a variety of machines in a variety of environments.

2014 Fielddays a Success! Thanks for Coming!

Diggers, Machine Control, UAV's, Laser Scanners....we had it all there. It got off to a wet and windy start but in the end the sun came out and the 2014 Fielddays was our largest and best show yet.

A big thanks to all visitors, friends and clients of Synergy Positioning Systems who came to see us this year. Lots of fun had. Also congrats goes out to Tim McColl of the Manawatu for winning the DJI unmanned aerial vehicle door prize. It's sure to be out doing some low level "fly bys" right about now!

Pip Carson, Synergy Hire - Staff Profile

Pip Carson - Synergy Hire Rental Manager
Waikato, New Zealand.

Synergy Position's Rental Manager, Pip Carson brings a vast amount of experience within the hire industry to Synergy Positioning Systems.
